“We offer you more than 50 years of technology and engineering know-how”

GOIZPER GROUP

HISTORY

GOIZPER S. Coop was created in 1959 in the Gipuzkoa town of Antzuola, part of the European industrial cooperative movement that developed in Mondragón.

Located in the most industrialized and technological area of Spain, GOIZPER has an advanced communications infrastructure.

Thanks to its extensive experience, and technological investment, along with continual effort, consistency and team work, the cooperative has become the most consolidated group in the international market for spraying and power transmission.

GOIZPER combines the objectives of a business company with the methods and values of a cooperative, creating employment, personal and professional development in its employees, as well as development of its social surroundings.

“The most valuable asset:
our people”

PRESENT

The extensive growth of GOIZPER has turned it into a structured Group based on different businesses whose activities carried out in facilities measuring over 35,000m².

There are currently three businesses:

GOIZPER INDUSTRIAL

Technological benchmark leader in **design, manufacturing and sales of differential solutions for power transmission and automation** for application in a variety of sectors: metalforming, automotive, aeronautics, packaging, construction, shipbuilding, tools-machinery, etc.

GOIZPER SPRAYING

Experts in the design, manufacturing and sales of **manual sprayers and dusters** offering treatments for sectors such as Agriculture, Gardening, Industry, Construction, Cleaning, Pest Control and Disease Control, etc. **Matabi, IK, Osatu and Inter** are our most prestigious brands.

GOIZPER BIOTECHNOLOGY

Specialists in research, development, creation and sales of **biocide products and advanced formulas**, GOIZPER develops differentiated solutions that are both efficient and sustainable, for problems such as crop plagues and environmental and food health issues, always respecting the environment.

**“Our strategy:
Growth through cooperation
Keeping products and business
moving forward”**

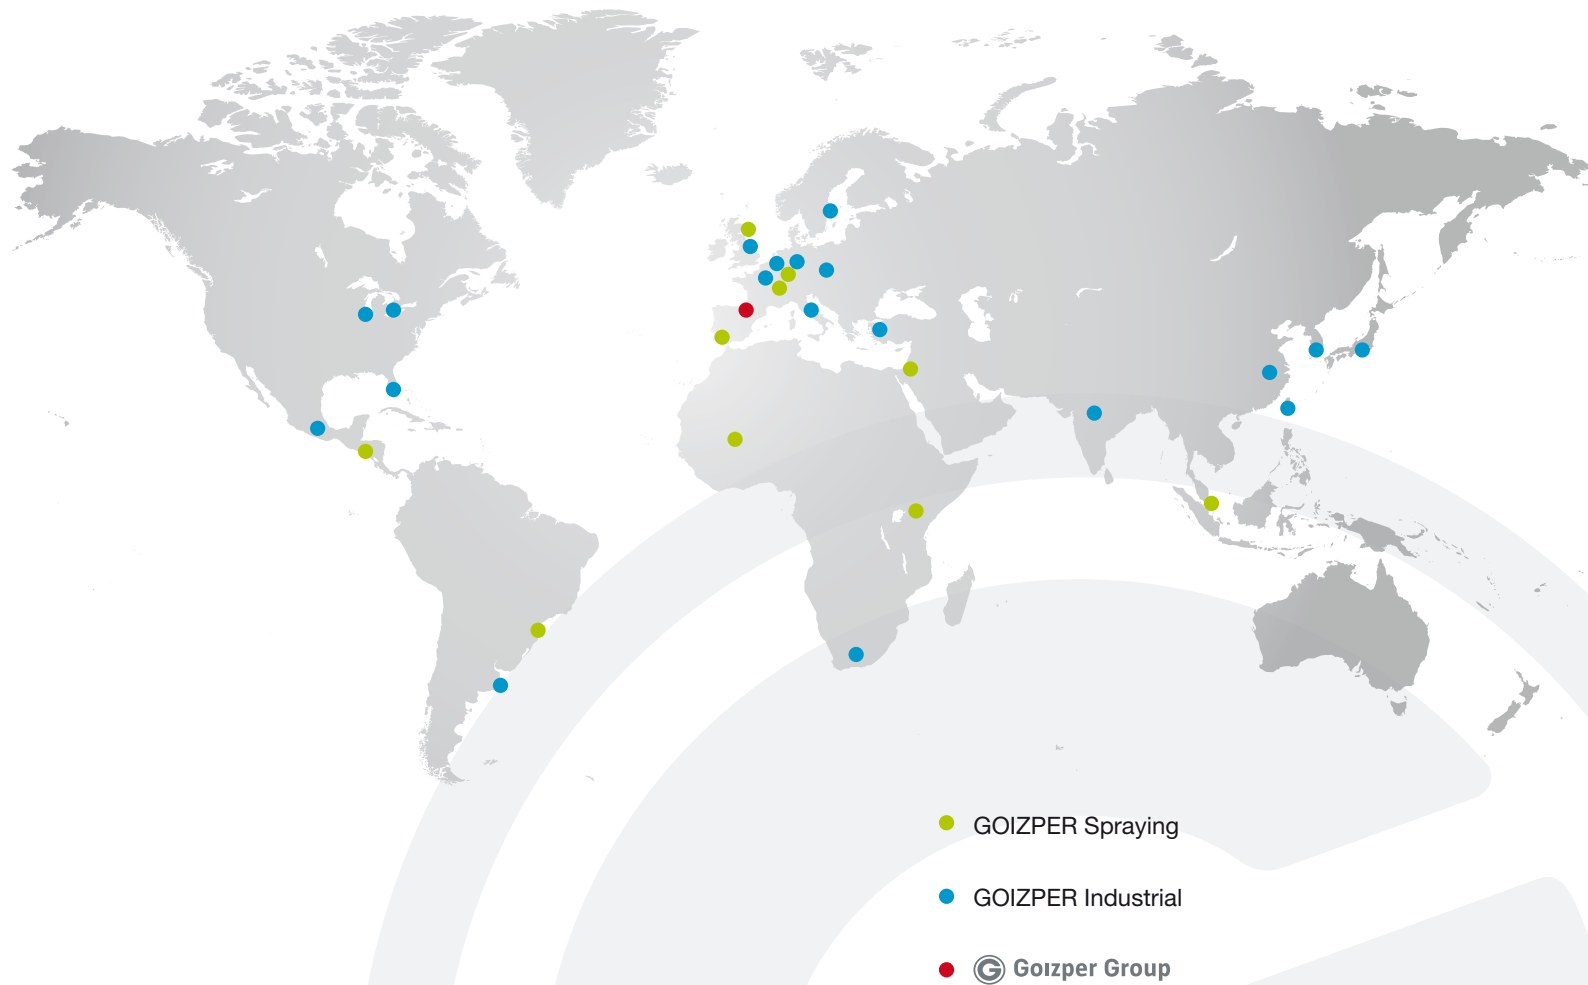

“All over the world”

“Close to the customer”

GLOBALIZATION

Given the importance of providing for an ever-more global market, GOIZPER has developed its own delegations in 5 continents as well as an extensive international sales and distribution network, guaranteeing rapid attention and response across the world.

“GOIZPER provides tailored solutions to each customer”

A man in a blue long-sleeved shirt and safety glasses is operating a control panel. He is looking down at the panel, which has various buttons and a yellow circular indicator. The background shows industrial machinery and a white structure.

“Working
towards
our common
future”

GOIZPER INDUSTRIAL

GOIZPER Industrial is one of the leading technological companies offering differential and global solutions in Power Transmission Components (Brakes, Clutches, Clutch-brakes, Index Drives, Camshafts, Lifting devices, etc.).

Continuous **research, innovation and a focus on quality** form the basis of the GOIZPER philosophy, resulting in a highly differentiated product range.

With **reliable, personalized and adaptable design** that is based on customer needs, GOIZPER is a top benchmark company in the market.

GOIZPER's product lines include:

- **Index Drives:**

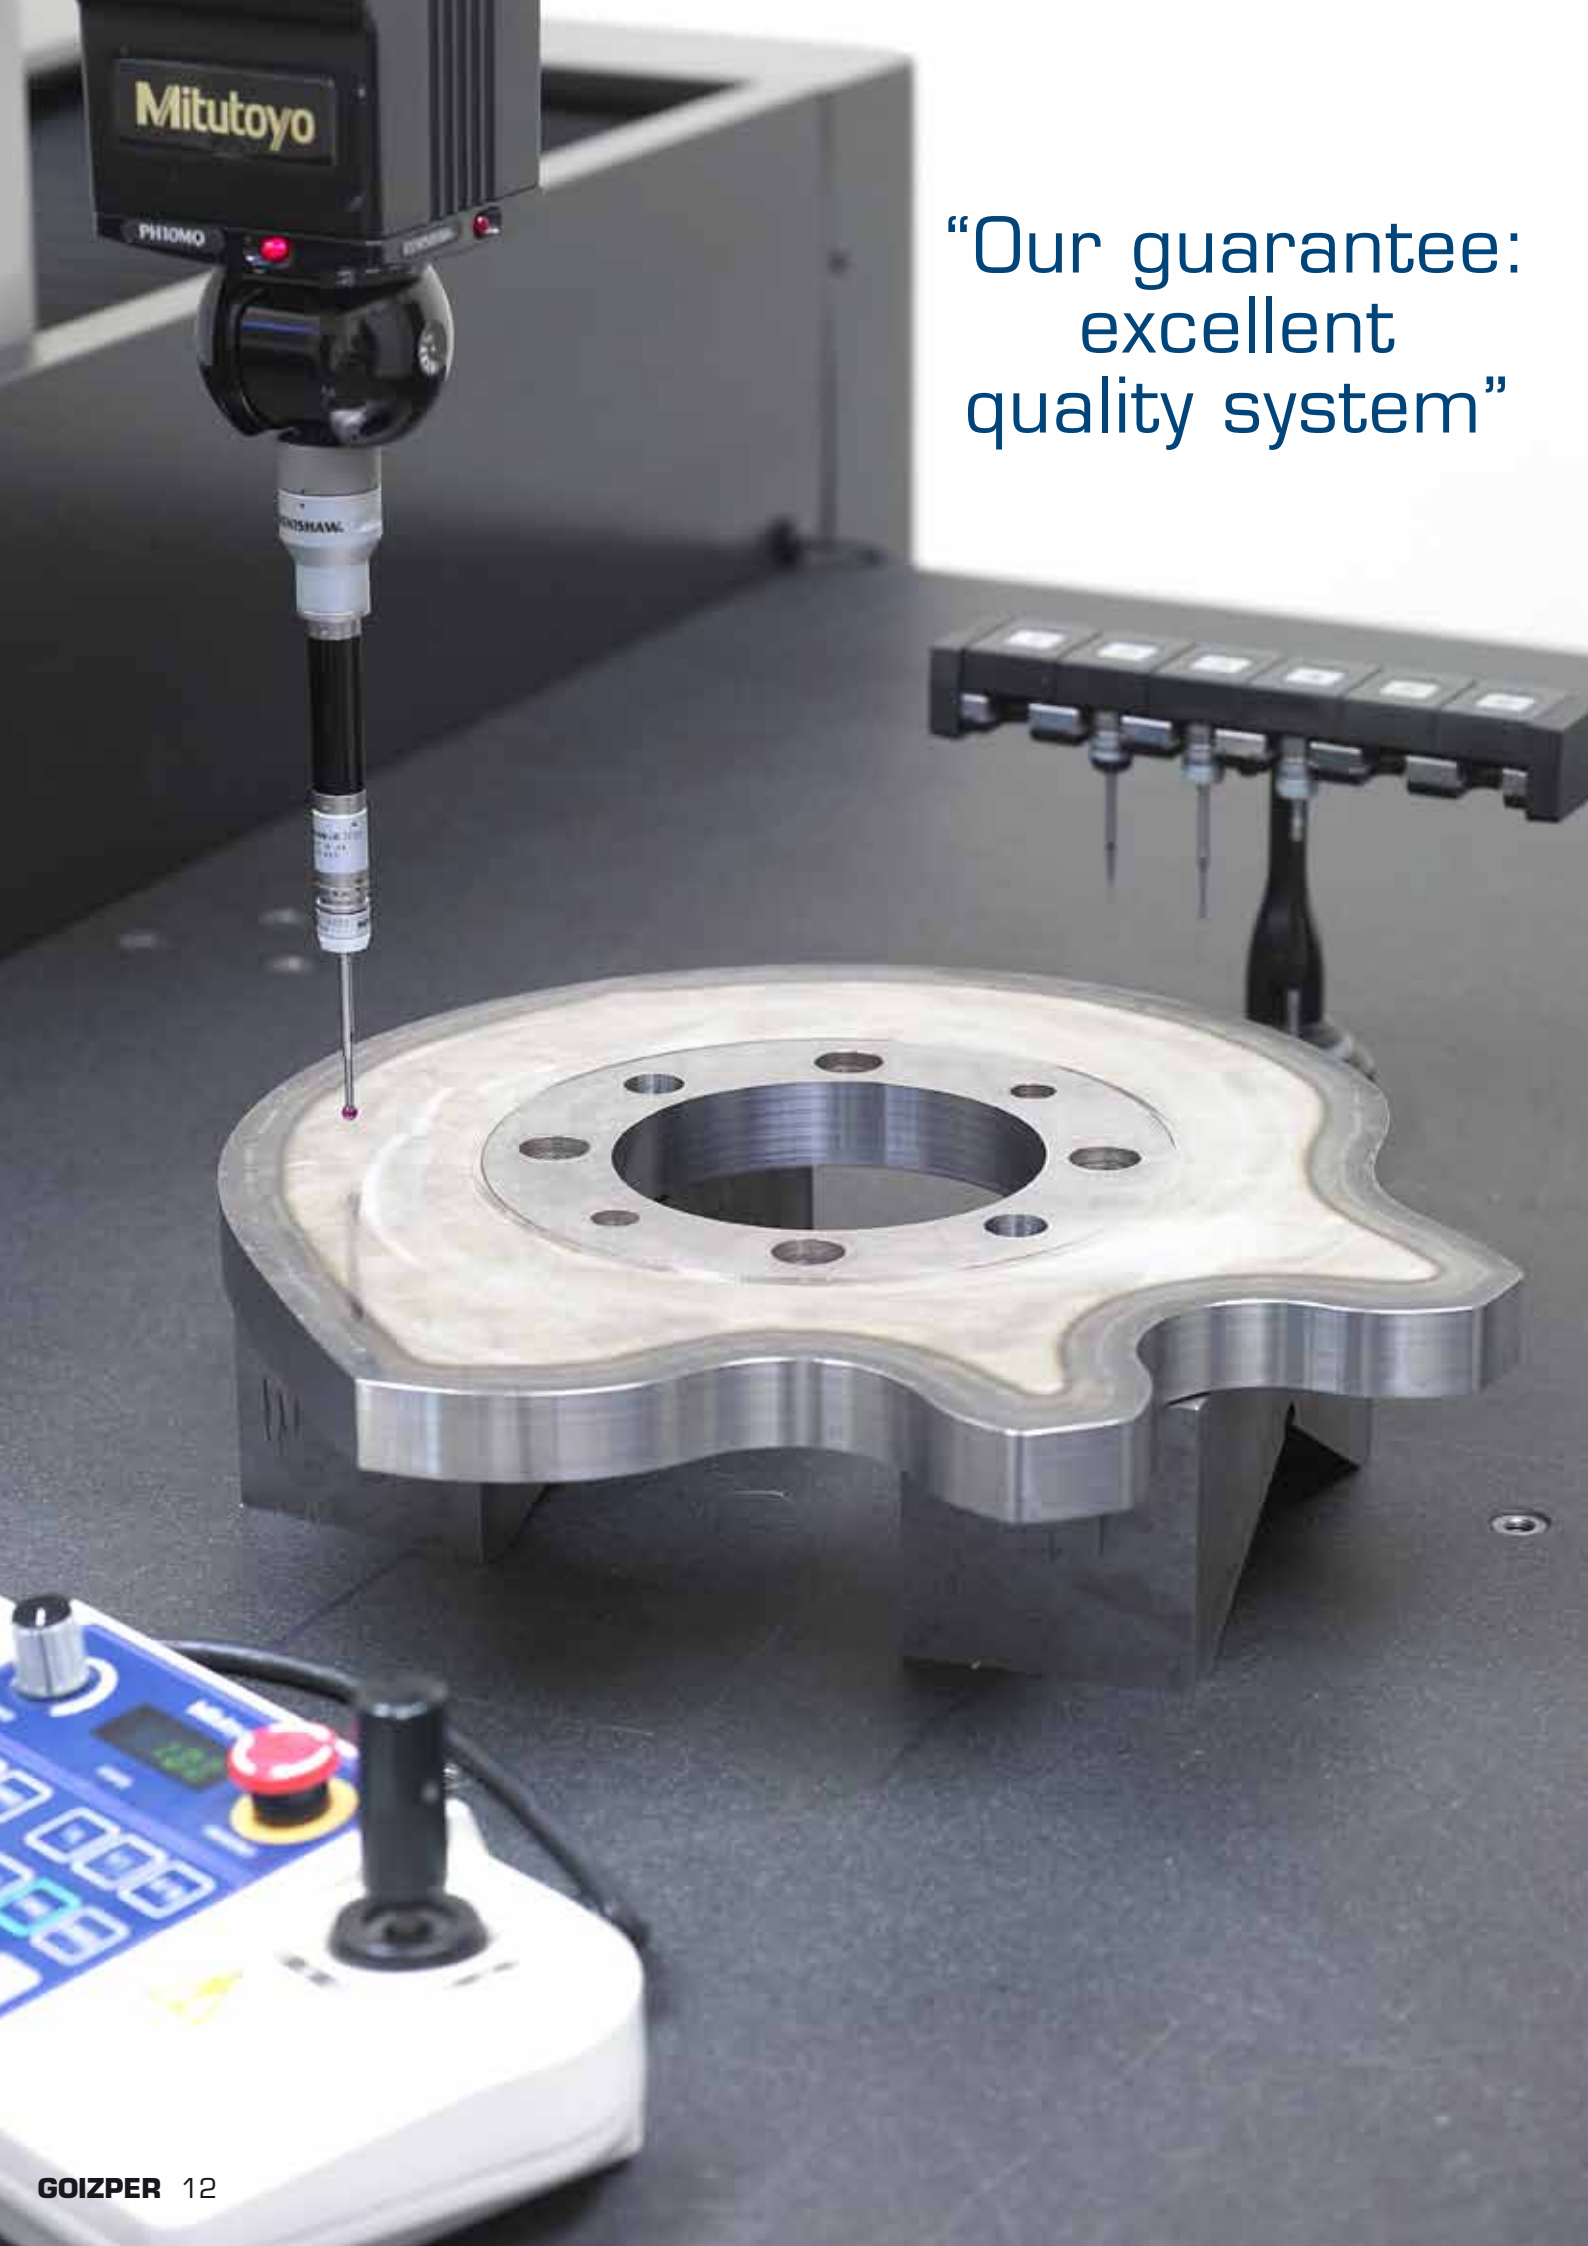

Based on Flat, cylindrical, globoid and special execution cams, according to the customer needs. For use in sectors such as: welding, packaging, automotive, aeronautics...

- **Planetary Gears Systems:**

Responding to power transmission needs with more compact units than those commonly found on the market and offering advantages such as reduced energy consumption and assembly time; improved production and speed; lower inertia of reducer set and increased dynamism.

- **Brakes, Clutches, CLUTCH-BRAKES:**

Pneumatics, Hydraulics, Electromagnetics, Mechanics are the key solutions that form part of the machinery in different sectors, such as metal cutting and metalforming with presses, shears, servo presses, folding machines, etc.

“Our guarantee:
excellent
quality system”

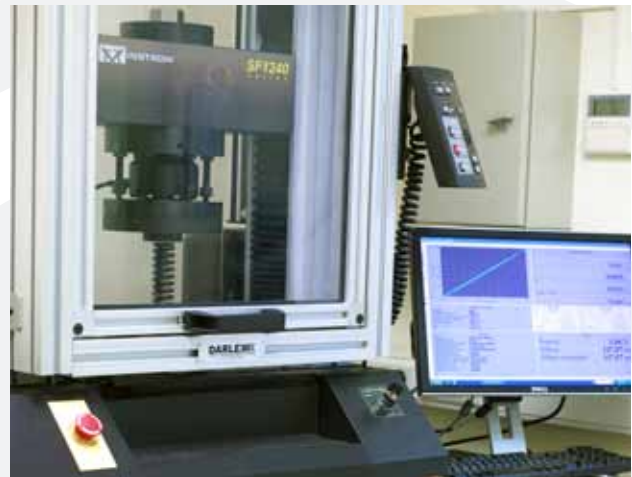

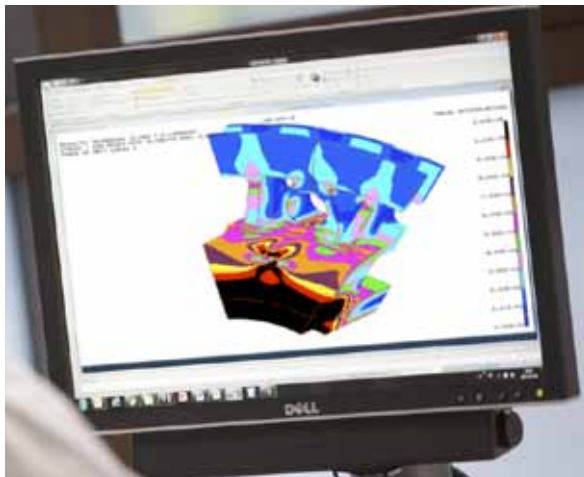

CONSTANT INNOVATION - OLAKER

GOIZPER has its own **Technological Centre for Research, Development and Innovation -OLAKER-** generating value thanks to technological research studies and creating efficient and sustainable innovations.

OLAKER is made up of a large technical team, geared to providing research projects and solutions in collaboration with the various destination sectors. New products are developed through its own technology, smoothly adapting to customer needs.

The study and analysis of power transmission elements by friction and cam mechanisms is a key aspect of the OLAKER expert group.

In addition, OLAKER offers its clients **personalized services through test benches and simulations of prototype functioning**, developed and adapted to their specific production systems.

“Our goal:
Improvements on new trends
and technologies”

OUR TECHNOLOGY

GOIZPER has **its own qualified production team, an important competitive advantage that offers an increased degree of autonomy and flexibility.**

This strong investment in machinery and manufacturing programs, improvement and optimization of production lines assures that the GOIZPER equipment is in compliance with the highest levels of quality as demanded by customers.

“Manufacturing integrated with high-tech production systems”

PROCESSES. PHILOSOPHY

LISTENING

Essential in order to offer the appropriate response is the ability to **listen to and understand customer needs**.

GOIZPER **collaborates**, offering the most profitable and competitive product solutions.

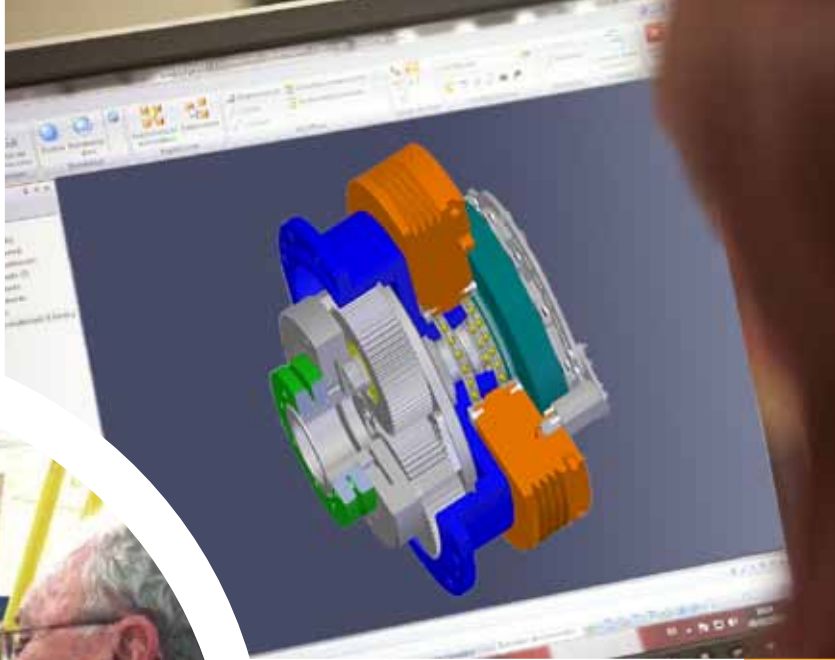

SERVICE

GOIZPER's Technical Assistance Services offer solutions and products manufactured ad-hoc for customer's machinery.

It provides replacement parts and offers diagnostic and maintenance services for its products across the world.

PROJECT DESIGNING

The Engineering Department and the OLAKER Innovation team analyzes and works together to develop the best possible solutions, applying their own technology and know-how.

Simulations and test benches ensure that products are top quality, efficient and ready for safe installation in customer facilities.

MANUFACTURING

GOIZPER consistently makes investments in innovation, technology and machinery to respond to the required specifications and manufacture while optimizing costs, in compliance with delivery deadlines and in response to competitiveness.

APPLICATIONS

Thanks to GOIZPER's technology and know-how, it is able to offer adapted, personalized and flexible solutions to different sectors and markets:

- Welding
- Metalforming & Metalcutting
- Agriculture and forestry
- Automotive
- Machine-Tool
- Textile
- Packaging
- Construction
- Access control
- Aeronautic
- Shipbuilding
- Lifting and transport
